

The Mobile Collaboration Experience on Android

Simplified Interface and Comprehensive UC Feature Set

Set My Status: let co-workers know if you're away from your desk, in a meeting, or don't want to be disturbed – Integrated to your calendar to automatically set status.

My Chats: keep track of instant messages to ensure business keeps moving.

Manage Conference Calls: like in the office – add, drop and mute calls on the fly.

Start IM Chat: tap to access chats with colleagues and maintain information flow anywhere.

Listen to Voice Messages: prioritize messages and respond with a message or call.

Start and Manage a Conference: quickly collaborate with colleagues, customers, vendors with "on the fly" conferencing.

Search Contacts: connect with colleagues via the IP Office directory, tap to call, IM and more.

Where Are You? geo-presence capabilities help speed response times to customers.
